

Wandji Collins, SOFTWARE ENGINEER

Software and DevOps Engineer focused on building secure and scalable APIs in startup and open-source environments. Strong background in PHP (Laravel), JavaScript/TypeScript, Python, and cloud infrastructure, with a proven track record of improving performance, reliability, and user engagement. Experienced in leading small teams, contributing to global open-source projects, and mentoring developers within local tech communities. Highly motivated to grow in a collaborative, international environment and contribute to high-impact products. Open to relocation and remote opportunities. Co-founder of Schola and TCPoS.

WORK EXPERIENCE

Tech Chantier (PoS) - Software Engineering Manager

Cameroon, Buea (in-person) 05/2024 - Present

- Research and design system flow using best engineering practices and guidelines.
- Manage and follow up with interns, review code, and support clients.
- Collaborate on continuous improvement and implementation of system features that would better help clients and improve their experience with the platform.
- Oversee the development of a multi-tenant website project that handles multiple client websites seamlessly, allowing each client to manage their website content independently.

Tech Skills: PHP, TypeScript, Laravel, React, React Native

TekSynapse.AI Limited - Software Engineer

Cameroon, Buea 01/2023 - Present

- Improve the Schola application for schools to make effective use of its features through feature recommendations, testing, and training of school administrators.
- Communicate with school database administrators on how to make effective use of the system features.
- Build and deploy a SaaS application that allows schools to have an institutional website of their own through which they can showcase activities and news about the school to parents and the public.

Victoria Technologies - Software Engineer

Cameroon, Buea (Remote) 08/2024 - 04/2025

- Contributed to the implementation of API endpoints for secure document and image uploads using temporary and permanent S3 storage via partial uploads, reducing upload time and enabling uploads of large files.
- Implemented the improvement of data modeling with polymorphic relationships to manage comments, documents, images, and watchers, enhancing data consistency and retrieval.
- Collaborated on optimizing frontend performance and fixed critical bugs in the app by 25%, improving load times and increasing user satisfaction by ~10%. This included developing new components, extending existing functionality, and integrating api endpoints.

TECHNOLOGIES

Languages: JavaScript (ES6), TypeScript, Python, PHP, Bash, Go

Backend: Node.js, Express, Laravel, Flask, MediaWiki

Databases: PostgreSQL, MySQL

DevOps & Cloud: Docker, Docker Compose, Vagrant, CI/CD (GitHub Actions), DigitalOcean, AWS, Linux (Ubuntu, CentOS), S3-compatible storage

Tools & Collaboration: GitHub, GitLab, Gerrit, Bitbucket, Jira, Trello, ClickUp, Phabricator

Other: REST APIs, GraphQL, Integration Testing, Agile/Scrum, Open-Source Development, WordPress

AWARDS or CERTIFICATIONS

Full Stack Developer

Nanodegree – Udacity (07/2022 - 10/2022)

Google IT Automation with Python – Coursera

Google IT Support

Specialization – Coursera, including Technical Support Fundamentals, The Bits and Bytes of Computer Networking, and IT Security: Defense against the Digital Dark Arts

Java Essential Training: Syntax and Structure

PHP: Design Patterns

Certified Java Core Programmer – Udemy (12/2020 - 01/2021)

- Accomplished the development of reusable components for uploading and previewing images and documents, adding comments, collecting user input, and displaying dashboard analytics, increasing the overall app experience by 15%.
- Collaborated on architecting and implementing the database models and the super admin dashboard for managing the clients who sign up to the platform.

Tech Skills: PHP, TypeScript, Laravel, Vue 3, Nuxt

Sozo Empire Ltd - Lead Software Developer

Cameroon, Buea (In-person)

10/2023 - 05/2024

- Worked as a lead software developer for this start-up.
- Analyzed and implemented system reliability issues, reducing software downtime by ~15% and increasing user engagement by ~25%.
- Led a team of 3 developers, introducing agile workflows that increased productivity by ~30% and reduced time-to-market by ~25%.
- Designed a data input and Excel import system using PHP, JavaScript, HTML, and Bootstrap, improving application flexibility and user experience by ~30%.
- Migrated production infrastructure from private hosting to DigitalOcean, configuring the LAMP stack, DNS, SSL (Certbot), and deployment workflows.

Tech Skills: PHP, Laravel, Node.js, MySQL, HTML5, Bootstrap

Wikimedia Foundation - Software Engineer (Season Contributor)

Cameroon, Buea (Remote)

11/2019 - Present

- Implementing integration tests, fixing bugs for MediaWiki extensions (PageForms), improving reliability, and reducing production regressions.
- Collaborated on the implementation of foreign resource management for PageForms to manage external libraries more effectively.
- Built and maintained third-party tools that use MediaWiki action API, SPARQL queries, and Wikidata APIs to retrieve, update, and structure Wikidata entities, lexemes, and other missing data.
- Contributed to multiple MediaWiki extensions, including Wikibase, Echo, and MediaWiki Core.
- Orchestrated timely code reviews within the team to promote clean code practices and build future third-party tools.

Tech Skills: PHP, JavaScript, TypeScript, Python, MySQL, NextJS, React, DevOps, Toolforge

OTHER WORK EXPERIENCE (Contracts)

Jalpa Health (Health Tech) - Full Stack Developer

Cameroon, Buea (Remote)

09/2025 - 12/2025

- Designed and implemented core platform features that improve system security and scalability for healthcare workflows.
- Implemented role-based access control and permissions database models and API modules to manage user access across the platform.

LANGUAGES

English (Fluent)

French (Communicative)

EDUCATION

University of Buea, BSc in Electrical Engineering (2017 - 2021). Cameroon, Buea.

Presbyterian Secondary School (PSS) Nkwen, GCE Advanced Level, Science (2015 - 2016).

Government Bilingual High School (GBHS) Tiko, GCE Ordinary Level, Science (2008 - 2013).

SOFT SKILLS

- Communication
- Leadership
- Teamwork
- Problem Solving
- Interpersonal Skills
- Time Management

Hobbies

- Traveling
- Outdoor games
- Music

Professional Associations

Manager, Google Developer Group Buea

Mentor, Wiki Mentor Africa

- Tested, debugged, and fixed critical system components, improving reliability and security for health professionals.
- Collaborated on improving the design of database table relationships, eliminating redundant table columns, and integrating migration schemas.

Tech Skills: TypeScript, Node.js, Next.js, React

Iknite Space (Training) - Coach, Software & DevOps Engineer

Cameroon, Buea (In-person)

02/2023 - 09/2023

- Provided technical leadership and mentoring support to a cross-functional team, coordinating both interns and trainees.
- Organized stand-ups, hackathons, and code battles, improving interns' and trainees' problem-solving skills by 15% through teamwork and collaboration to build innovative tools and applications.
- Collaborated on the design and implementation of CI/CD pipelines using GitHub Actions, bash, and AWS, reducing deployment failures by ~25% and improving release cycle time by ~40%.
- Set up testing frameworks and code structure for the team.

Tech Skills: TypeScript, JavaScript, Node.js, React, Golang, Gin, DevOps, cloud

Digital Renters - Back End Developer

Cameroon, Buea

09/2022 - 01/2023

- Directed the implementation of a project management listing tool to streamline landlords' property uploads for rent and sale.
- Contributed to a modular system by consolidating service patterns and migrating models and databases to a separate module.

Speed Net - Software Engineer

Cameroon, Buea

07/2021 - 01/2023

- Developed web applications with WordPress.
- Guided and mentored interns through programming practices and software engineering concepts.

ZIPCOIN REMIT LTD - Software Intern

Remote

04/2021 - 06/2021

- Worked on the website with Gatsby, GraphQL, and React, and corrected design issues.
- Engineered and optimized APIs with Laravel, reducing response time.
- Collaborated on GitLab for CI/CD and code review.

OpenMRS - Intern, Google Summer of Code

Cameroon, Buea

04/2019 - 06/2019

- Developed an Open Web App within the OpenMRS organization.
- Built the application with React, Axios, and the Yeoman generator.

PROJECTS

WdTmCollab app (Ongoing). Software developer, Maintainer, TypeScript, Node.js, Next.js, React.

WdAudioLex app (Ongoing). Software developer, Maintainer, TypeScript, Python, Next.js, React, Flask.
